

"It was truly impressive how well Deloitte and SpearMC cooperated to bring the project to the finish line. Both work together, to provide Chesapeake with PeopleSoft consultation and support. We are highly satisfied with the results."

Partnering up to support a friend in need.

Chesapeake Energy Corporation, the second-largest producer of natural gas in the United States, was working with Deloitte Consulting on a PeopleSoft implementation. As the project grew, additional resources were required.

Developing relationships and solutions under a tight deadline.

Typically, working together with other consulting firms requires an adjustment period, however, there was no time to spare for this project. At a moment's notice, we quickly established a working relationship with Deloitte's team and began providing functional expertise in PS Financials and assisting with the design of the end user training program. Our partnership worked so

well that we were specifically sought out to assist with additional aspects of the project.

This successful partnership resulted in the development of a comprehensive training program, consisting of printed documentation, online UPK content and instructor-led training.

The project included implementation of the following PeopleSoft v.9.1 Financials and Supply Chain, Oracle Database functionality:

- Project Costing
- General Ledger
- Asset Management
- Purchasing
- Accounts Payable
- Accounts Receivable & Billing
- Inventory & Cost Accounting
- Manufacturing
