

NETSUITE CLOUD ERP

“ SpearMC helped us with our NetSuite implementation in a short amount of time. Our legacy accounting system was no longer keeping up and we needed to scale for growth.”

Nathan Hieter – VP Finance, SoFi

Delivering high performance through the cloud

NetSuite is the industry leader in cloud based financial services, ERP and omnichannel software suites. Through SpearMC, NetSuite helps multi-company organizations manage their complex needs and high-growth without high costs or inefficiency.

Embrace cloud solutions

- Enterprise cloud ERP solutions
- Omnichannel ecommerce support
- A single ERP suite that meets complex enterprise needs
- Professional services automation
- Business process as service solutions
- Accelerated time to value
- Lower costs

The marketplace is currently experiencing a shift from traditional on-premise ERP solutions to NetSuite, an attractive cloud-based alternative that enables businesses to run core applications without having to maintain site infrastructure and staff. Powerful and cost-effective, NetSuite offers strong software functionality, customizable flexibility and shorter implementation time than its on-premise ERP counterparts.

Strategy, planning, and execution all in the cloud

NetSuite offers industry specific solutions for rapidly growing organizations in the software, biotech, retail and service industries by combining business strategy and expertise in IT execution with ERP cloud technology. Through SpearMC's well trained tech teams, your company will be able to identify its most critical challenges and define the steps needed to address them with Netsuite's cloud deployment.

Benefit from our experience

SpearMC offers a broad range of services for NetSuite customers:

- End-to-end implementation services
- Optimization services that continually improve the environment after launch
- Organizational changes to management and training
- Security and SOX controls
- Financial and supply chain transformations
- Legacy and third-party integration development
