

# PEOPLESOFT ON ORACLE CLOUD

## PEOPLESOFT ON OPC ASSESSMENT

SpearMC provides a cost-effective PeopleSoft on Oracle Public Cloud (OPC) Assessment for customers to explore and compare varying cloud strategies. We assess the viability of these strategies as they apply to each customer's goals, strengths and opportunities for improvement.

During this assessment, our team gathers data points and business drivers relating to infrastructure, current platform and change management. We compare those requirements with the benefits of several solution offerings from Oracle, including IaaS/PaaS/DaaS and Bare Metal. After a recommendation has been made, SpearMC can procure and provide your new Oracle Cloud platform.

## HOSTING & APPLICATION MANAGEMENT

SpearMC hires the best and brightest PeopleSoft Architects, Functional Business Analysts, PeopleTools Developers and PeopleSoft Testers so that you can focus on what matters most to your business. Leverage our thought leaders and our economies of scale in providing architecture for flat monthly fees.

Allow us to guide your organization through many of the challenges you currently face including PeopleSoft Upgrade Manager (PUM) adoption and upgrade selection strategy, testing efficiencies, custom development or support, application training and cloud infrastructure solutions.

## Deploy PeopleSoft on Oracle Cloud.

### SpearMC experts will show you the way.

Oracle Cloud migration benefits include:

- **SPEED DEPLOYMENT** – Use Oracle Marketplace Images to rapidly deploy PeopleSoft instances
- **ELASTIC COMPUTE** – Scale up or down based on processing loads and storage needs
- **PUM UPGRADES** – Deploy PUM Images in half the time vs. on-prem
- **EXTEND WITH PaaS/DaaS** – Enhance Oracle IaaS or Bare Metal with full PaaS and DaaS capabilities
- **REDUCE TCO** – Three-year TCO to savings of up to 50% on operating and headcount costs
- **FULL INTEGRATION** – Best-in-class Oracle API adaptors to accelerate integration with your cloud and on-prem assets

## CLOUD READINESS ASSESSMENT

### Let the experts at SpearMC guide you through the cloud adoption process

- Plan and identify cloud investment opportunities and related Return on Investment Calculations
- Compare business requirements with several cloud strategies and related provider value propositions
- Identify Capacity Requirements
- Optimize operating system and database with cloud integration
- Document as-is and to-be Disaster Recovery Plans and Procedures
- Advise your leadership regarding regulatory and audit implications
- Procure or Provide your new Public or SpearMC Cloud Infrastructure
- Strategize best practices to enable long-term growth strategies

## LEVERAGE THE SPEARMC CLOUD

### Increase return on ERP investment and reduce your total cost of ownership

- Move your PeopleSoft Production Environment from local servers to a cloud-based infrastructure
- Install all PeopleSoft Services to a secure cloud environment
- Perform Unit and System testing
- Load current Production Database to the new environment
- Assist users with UAT to validate all functions perform as needed
- Reduce costs of supporting internal hardware and allowing flexibility in adjusting resources as needed
- Development and testing of your PeopleSoft systems with a flat fee SLA for support

## CLOUD ARCHIVING & BACKUP

### Set your backup frequency and depth, then let us do the rest

- Using a predefined template, you can select any queries and multiple objects that meet your archiving and restoration requirements
- PeopleSoft Data Archive Manager uses PeopleSoft Query to define selection criteria from the base table
- Define archive jobs to archive data to history
- Restore jobs to restore any subset of archived data to production tables
- Upload archived dataset to a live environment that can be queried and reported
- Create custom SQL to archive custom, non-base tables and relationships
- Back up your entire Peoplesoft environment including Database, web servers, file servers, application servers, report servers as needed

## DISASTER RECOVERY

### Sleep better at night knowing we'll support the continuity of your business.

- Move your PeopleSoft Production Environment from local servers to a cloud-based infrastructure
- Installing all PeopleSoft Services to a secure cloud environment
- Perform Unit and System testing
- Load current Production Database to the new environment
- Assist users with UAT to validate all functions perform as needed
- Reduce costs of supporting internal hardware and allowing flexibility in adjusting resources as needed
- Flat fee SLA's for support, development and testing of your PeopleSoft systems
