PEOPLESOFT MOBILE EXPENSES

Comprehensive Mobile Expenses Functionality

- Easily access from Fluid Homepage
- Instantly see status of all Requests
- Add New Request for Travel Authorization
- Quickly Choose Expense Types
- Configure Accounting Default Splits
- Simple Drill-Down Functionality
- Upload Expense Reports
- Text Receipt Images via Twilio
- Mobile Approval
- Expense App for iOS and Android

Your Modern Mobile Expense Capture & Approval Application

PeopleSoft Mobile Expenses has native mobile functionality designed specifically for today's expense capture and approval demands. Written in pure Fluid architecture, PeopleSoft allows easy configuration of mobile content, with an extensible framework to accommodate unique processes and configurations. SpearMC also delivers an optional mobile app for Apple and Andoid to anhance the user experience.

SpearMC's PeopleSoft Mobile Expenses Solution simplifies expense reporting, helping employees stay on top of their receipts and submit timely expense reports, while also helping companies tighten their expense cycles. Snap a picture of receipts from anywhere. Text to PeopleSoft via Twilio. Add receipts to your wallet right when you get them, or match receipts to existing wallet entries. Expense reports can be submitted directly from their mobile device for approvals.

FEATURED CLIENT

PEMCO Insurance

HOW WE HELPED PEMCO SUCCEED

- Through SpearMC's alliance with Oracle, PEMCO was put on 'Early Adopter' status, providing access to key product personnel within Oracle

- Templates for project deliverables enabled the team to focus on executing the plan, and drove to an on-time delivery

- Experienced implementation consultants pointed out common road-blocks to bank integrations, and removed the roadblocks before they became issues

Turning plans into action

The tagline at PEMCO Insurance, based in Seattle WA, says a lot: "We're a lot like you. A little different." A mutual company owned by their customers, PEMCO has uniquely served its community, its employees, and its customers as equal stakeholders. With such flexibility, PEMCO developed a complex set of rules for their travel and expense program in support of these stakeholders. Modernizing PEMCO's expense reporting required an equally flexible system.

⚠ CHALLENGE PRESENTED

Travel and expense reporting at PEMCO Insurance was a highly manual effort. There were virtually no system integration points in place, and reconciliation of expenses had become a daunting task. A modern toolset was needed, with minimal impact to end users.

PROPOSED SOLUTION

PEMCO turned to SpearMC to propose the use of Oracle's PeopleSoft Expense Reporting module. SpearMC developed a ten-week program for the deployment program. In order to take advantage of the latest mobile functions available in Image Release 19, SpearMC also proposed an upgrade to the PeopleTools infrastructure to 8.55.

RESULTS ACHIEVED

In just four weeks SpearMC deployed the PeopleTools upgrade, and then ten weeks later the Expenses toolset was deployed. Visa bank files for expenses on corporate cards began to be integrated on a daily basis, allowing users to pull in expenses without manually coding them. Mobile functionality was deployed to allow users to download pictures of receipts. Expense approvals were automated through a workflow engine, further reducing the movement of paper transactions.
